1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

which are satisfied by the functions $u_i(x, y, z)$ and $v_i(x, y, z)$ in the domain D of the space E_3 bounded by the surface S .

2. In the second part of the paper we shall consider the case when the surface S is a sphere of radius R and the functions u_i and v_i are assumed to be regular in the domain D .

3. In the third part of the paper we shall consider the case when the surface S is a sphere of radius R and the functions u_i and v_i are assumed to be regular in the domain D .

4. In the fourth part of the paper we shall consider the case when the surface S is a sphere of radius R and the functions u_i and v_i are assumed to be regular in the domain D .
